

5 Tools to Communicate and Engage Virtually

Communicating and engaging with your students comes naturally in a face-to-face environment, but how can you accomplish this virtually? These 5 tools can help:

Canvas Announcements: Send a message to the whole class instantly, or pre-set messages for future reminders.

Web Conferencing Tools - A great space to hold synchronous course meetings, virtual office hours, or optional study sessions. This could be through Zoom, WebEx, or Google Meet.

Kaltura Capture - Record and embed an instructor introduction, Canvas course video tour, and module Overviews.

Canvas Speedgrader - Mark or record feedback on students' work directly. You can annotate, highlight, mark, comment, and grade in one space.

Google Chat - An instant messaging tool for just-in-time text-based conversation or a quick Q and A.
